

Audio Book Panel

Our BookScan service is the world's largest continuous book sales tracking service operating in key markets around the world.

Our Audio Chart uses data that has been weighted and validated and we use the same rigorous checks that we use for printed books, thus ensuring we provide the most accurate and consistent data available.

You can create Audio Charts and Timelines (maximum 1,000); in the same way you create book charts/timelines,

and you are able to run cumulative bestseller lists and lifetime sales on audio books. Online historical lifetime sales start from Sunday 7 October 2007.

The Audio Panel now contains the same participants as the Total Consumer Market (TCM), see below and the Audio Panel is the basis for the Audio Bestseller charts you see in The Bookseller and its supplements.
